Reg. No. 1966/001741/07

To: Aqua Salveo
Attn. Ms. A Grobler

Date: 27/11/2018

Analytical report on bactericidal effect of *Aqua Salveo* treated tap water on *E. Coli* spike test

Method of test:

1. A sample of sterile water was spiked with *E. Coli* and tested for total bacterial count
2. A sample of 11 year old tap water treated with 0,09 ml *Aqua salveo* per Litre 11 years ago, was spiked with *E. Coli* and total bacterial count at start and after 30 minutes was performed
3. A sample of sterile water spiked with *E. Coli* at start and after treatment with 0,09 ml *Aqua Salveo* was assessed for total bacterial count at zero and after 30 minutes.

Results:

Sample	Original CFU count	After 30 minutes CFU count	Kill rate %
Sterile water	29000	29000	0
Old sample tap water treated with A.S	29000	<10 cfu/ml	99.9
Sterile water spiked with e. coli and then treated with A.S.	29000	<10 cfu/ml	99.9
